persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

National Agriculture Statistics Service

TITLE: Cotton Ginning Survey

OMB CONTROL NUMBER: 0535-0220

SUMMARY OF COLLECTION: The primary objective of the National Agricultural Statistics Services (NASS) is to collect, prepare and issue state and national estimates of crop and livestock production, disposition and prices as well as specialty agricultural and environmental statistics. The Cotton Ginning Survey provides statistics concerning cotton ginning for specific dates and geographic regions and aids in forecasting cotton production. The Cotton Ginning surveys obtain data mandated under U.S.C. Title 13, Section 42(a). General authority for these data collection activities is granted under U.S. Code Title 7, section 2204.

NEED AND USE OF THE INFORMATION: The majority of data are collected by telephone, mail, and fax. All active gins for a given crop season in all 17 cotton producing states are included in the survey. The ginning data collected provides (1) all segments of the cotton industry – buyers, brokers, crushers, shippers, textile firms, and researches with exact quantities of cotton available at specific geographic locations within the U.S. on a regular basis; (2) precise statistics, especially when at least 50 percent of the forecasted cotton production has been ginned in a state; and (3) final season ginning data is used to establish final production. If the information were collected less frequent, the cotton industry would be without county level quantities ginned that could seriously affect transportation costs and marketing strategies.

DESCRIPTION OF RESPONDENTS: Business or other for-profit
